ACRYLIC Laminate

1.5mm | 1.25mm
anti scratch

DECORATING

A type of finish similar to lacquer, Advance acrylic laminate is a non-toxic, anti scratch, reflective high gloss finish which give cabinets a smooth appearance. It is made of polymer fibre, available in a wide range of colours and will give a mirror-like look to your interior. It is a durable decorative option as it leaves a reflective and glossy sheen on the surface of shutters which lasts for years. It comes in a range of bright colours that uplift the aesthetics of your interiors.

Talking OVER

OUR STORY

Dear customer, it's our Privilege that

You have selected advance laminates for your surface decoration requirement.

We have over 500 options in various finishes for your residential and commercial spaces be it your drawing room, bedroom, kitchen, wardrobe, office or showroom, we have everything for all needs, utmost care has been provided while manufacturing the emotion of the end users while selection the design. This presentation also has QR codes given with each design, if you wish to see the full sheet view of any design. Also we have given an application book that will help you while selection the design according to a particular application.

Advance decorative laminate is a part of the AMBA GROUP which has been serving the panel trade since 1991. Our manufacturing facility which is spread across 10 acres is located in Hapur, 30kms. east to the national capital, Delhi. The factory is equipped with state-of-the-art machinery majority imported from Europe.

The designs films are sourced from different parts of the globe namely ITALY, KOREA, JAPAN and UNITED STATES. We can truly say we bring the best of the world to India and also push forward the make in India initiative. We have been awarded with ISO 9001:14001 and 45001 certifications where we are committed to comply to world's best standards of quality control, safety of our people and also keeping our environment clean and future safe. We have also been awarded CEMARK, FSC and IGBC which enables us to go about our business while keeping nature protected. We currently have presence on more than 20,000 retail outlets, spread across India. We truly believe in the concept of better than before and consciously strive to improve everything we do.

ANTI SCRATCH ACRYLIC LAMINATE

CLASSY & SUPER GLOSSY SURFACE
with Amazing features to stay longer in your interior

DURABILITY

Advance Acrylic laminate is highly durable & hard-wearing.

RESISTANCE TO WATER & HEAT

Advance Acrylic laminate is water proof & resistance to heat & changing weather.

PREMIUM APPEARANCE

Gives the surfaces a super glossy, sophisticated appearance.

RESISTANCE TO SCRATCH

Advance Acrylic laminate is excellent scratch resistance properties.

LOW MAINTENANCE

Since Advance Acrylic laminate is anti scratch so it possesses very low maintenance. Just a normal wipe with clean cotton cloth is needed to clean it up.

PREMIUM FINISH

Highly reflective surface with a mirror-like sheen that retains its color & brightness over the years.

TIPS TO KEEP ACRYLIC GLOSSY LAMINATE NEW FOR YEARS

Thanks for selecting such a beautiful and long-lasting Advance acrylic laminate. It is very easy to maintain advance acrylic laminate. By following the some measures you can enhance the life of acrylic glossy laminate.

- To clean the surface of acrylic laminate do not use thinner.
- Wipe the surface gently with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solution as these may damage the surface of the laminate.
- Use mild house hold glass cleaner like COLIN to remove more stubborn stains.
- Clearing should be done with water and a clean, non-abrasive cloth.
- Do not place hot cookware directly on the laminate.
- Acrylic Glossy surfaces looks more beautiful when used for A vertical applications.
- Always store acrylic laminates at temperature below 300 Celsius.
- Avoid the prolonged exposure to temperatures above 300 Celsius, that may cause damage to the laminate surface.

BEST WAYS TO USE ADVANCE ACRYLIC LAMINATES ON INTERIOR FURNITURE

- Always clean the dust particles properly from the substrate (plywood/MDF/Particle Board) surface by cloth or soft brush.
- Always use good quality branded PVC adhesive to stick acrylic laminate on substrate. Please don't add water in adhesive before using it.
- Spread the adhesive uniformly by brush, roller or adhesive spreader on acrylic laminate and base substrate (Plywood, MDF, Particle Board).
- It is very necessary to remove the air between acrylic laminate and substrate. Please leave minimum 2mm of groove between two pieces of acrylic laminate.
- At the time of pressing acrylic laminate on base substrate (Plywood, MDF, Particle Board) always use soft pinch roller or normal pressing technique to protect surface from any damage.
- The pressing should be done from the middle of the panel and move towards to the sideline and corners of the panel.
- For better bonding of acrylic laminate on substrate, press it for minimum 12 to 15 hours.

HOW TO GET RID OF GENERAL PROBLEMS LIKE BUBBLE & CRACK IN ACRYLIC LAMINATE.

- Avoid the lamination process of acrylic laminate under high humidity environment.
- Use the good quality branded adhesive during installation to avoid air bubble after installation.
- Prevent the base substrate (Plywood, MDF, Particle Board) to absorb moisture. Because after few days of installation, base substrate gradually loses moisture and this resulting in air bubble formation between acrylic laminate and substrate.
- Always use calibrated substrate for furniture. Don't use uneven surface substrate (Plywood, MDF, Particle Board) that may lead to air vacuum and air bubble which may appear after the installation.
- Take extra care during use of big size acrylic laminate for panelling because due to the bigger surface area, improper lamination may lead to air bubble formation after installation.
- Provide the proper recommended time because short bonding/pressing time during the installation of acrylic laminate may lead to air bubbles.
- Keep the acrylic laminate sheet evenly straight. Leave the roll acrylic sheet straight for minimum 48 hours before using it.

DO YOU KNOW HOW TO PREVENT THE COLOR FADE OR YELLOWING OF ACRYLIC LAMINATE?

- Do not expose your acrylic laminate furniture to direct sunlight, it may cause discoloring, fading and yellowing of the laminate.
- Don't use inferior quality over chemical dipped plywood as it can react with adhesive which may cause yellow patches after the installation.
- Don't use synthetic rubber adhesive for bonding as it may lead to brown / colored patches on acrylic laminates.
- Prolong exposure of acrylic laminate above 30-degree temperature should be avoided.

How Advance Acrylic laminate

is **BETTER** than **LACQUERED GLOSS**

► Aesthetics

ACRYLIC LAMINATES are preferred decorative surface material for gloss finish. And, they add a visual appeal to your interior.

LACQUERED GLOSS are comparatively less striking in compared to **ACRYLIC** laminate & needs utmost care after & during application.

► Colors & Varieties

ACRYLIC FINISHES retain their color and brightness for ages and are available in plenty of vibrant colors.

While, **LACQUERED GLOSS** has limited variety of color & pattern.

► Maintenance & Durability

While **ACRYLIC FINISHES** are scratch resistant. They do tend to get scratched over the years, but always appear ultra-glossy and relatively smooth.

While **LACQUERED GLOSS** are tend to have scratches on its surface very easily.

► Cost

As **ACRYLIC FINISHES** are aesthetically more appealing and are easy to clean, they come with lower price than Lacquered Gloss.

While **LACQUERED GLOSS** comes with very high price tag in comparison to **ACRYLIC LAMINATE**.

► User Friendly and safety:

ACRYLIC LAMINATES are available in **1.50** and **1.25mm** thickness & they are lighter in weight. So it is safe to use **ACRYLIC LAMINATE** in interior.

LACQUERED GLOSS are available in **6mm** thickness and they are heavy in weight so it is very much risky to use it in interior. There is always a chance of accident during and after the use of Lacquered Gloss.

Do you KNOW?

The Difference Between 1.25 & 1.5mm Acrylic laminate

The thickness plays an important role
in look and feel of **ACRYLIC LAMINATE**.

Just have a look:

1.25 MM Acrylic Laminate

1. Less scratch resistance, more prone to scratched & stains.
2. Less reflective surface, having low gloss effect
3. Comparatively less life

1.50 MM Acrylic Laminate

1. High reflective surface, having high gloss effect than 1.25mm thickness.
2. 100% Scratch resistance surface
3. Long life in comparison to 1.25mm

BEST WAY TO USE ACRYLIC LAMINATE:

To avoid the colour variation in **ACRYLIC** laminate during application in interior, please use the similar batch number acrylic sheets. There may be slight variation of colour in different batch number.

SUGGESTION WITH TERMS AND CONDITIONS

- There will be no guarantee or exchange under any circumstances.
- Color variations in products from different batches are possible.
- We recommend using products from same batch to avoid color variations.
- Do not use plywood with high moisture content.
- Do not use ply with uneven surface.
- Use only recommended adhesive.
- Apply sufficient pressure.
- We do not recommend pasting of sheets on the printed/branding area of the plywood.
- To avoid De-lamination/air bubbles in between ply & acrylic laminate sheets bonding of acrylic laminate should not be done under high humidity.

India's Most Favourite Decorative Collections

(Company warrants that all its products are free from manufacturing defects and perfectly fit for use under normal conditions. In case of any claims, the liability of the Company is however limited to the cost of the product only.)
